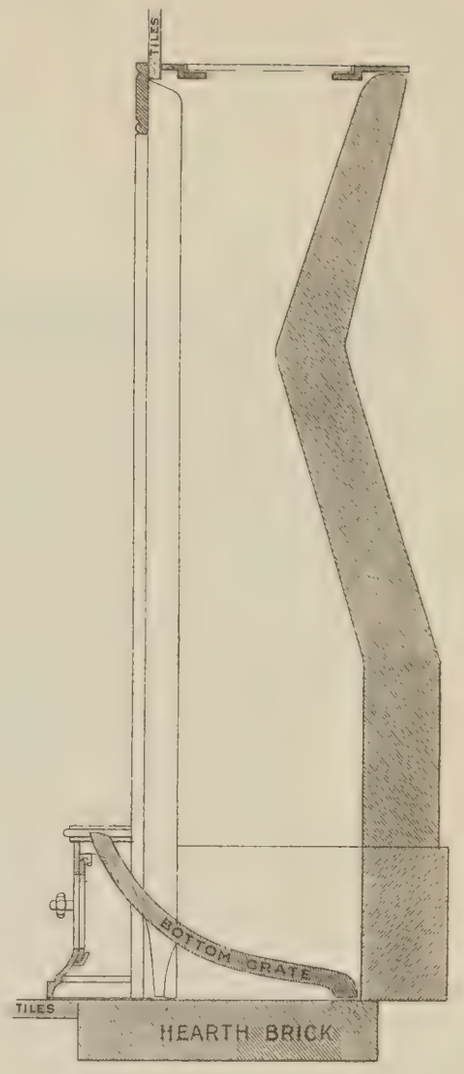
Sizes ... 16″ 18″ 20″ 22″ 24″ by 30″ for Tiles.
,, ... 12″ 14″ 16″ 18″ 20″ Fire.

Black, £2 2s., Ground bright, £2 13s. 6d. each,
including all bricks.

If with steel beading, as on 36 E beaded, 14/- extra.



THIS grate is a simplified and improved form of the Fire upon the Hearth, providing for the admission and regulation of a certain amount of draught through the fire

The portable bottom grating, supported on legs in front and resting on hearth brick at back, is curved in section and stands by itself. It has in front of it a Screen, (also portable, and provided with hit and miss ventilator), the openings therein being sufficiently large to show the lower portion of the fire when the ventilator is open

The hearth is composed of a solid brick, which, whilst providing for safety, also does its part in adding to the heating power of the fire. The lower portion of the brick back is thick and rests upon the hearth brick ; upon this stands the deflector or "KNEE" brick, the shape or contour of which is calculated to react upon the burning fire and thereby consume a large proportion of the smoke arising therefrom.

The Elevation, Plan, and Section illustrates the above, and the principle is capable of application to some other of CARRON COMPANY'S grates and mantel grates

Extra for a canopy in black iron, 8/6 ; steel, 10/- ; brass or copper, 13/-

Scale, 1½ in. = 1 ft.
